

EDITOR'S PREFACE

It is pleasure this year issue of the Annales Bogorienses to our audience. The articles in this issue cover a broad variety of original papers with topics on Tissue Culture Propagation of *Solenostemon rotundifolius*, Isolation of cDNAs Encoding Asparagine Synthetase from *Coronilla rostrata*, Segregation Analysis of Transgenic Rice Plants cv Rojolele Harboring *cry1B* Gene and Plant Selection for Potential Resistant to Yellow Stem Borer, Cellulolytic Yeast Isolated From Raja Ampat Indonesia, and Diversity of Actinomycetes from Soil Samples Collected from Lombok Island, Indonesia.

It is hoped that this issue will make a good reference material and be of great use for life sciences.

June, 2012
