Dear Editor of Biotropia

We wish to submit a new manuscript entitled "Growth Performance and Product Quality of Striped Catfish Fed Diets with Different Protein Levels and Enriched with Recombinant Growth Hormone" for consideration by the Biotropia.

We confirm that this work is original and has not been published elsewhere nor is it currently under consideration for publication elsewhere.

The paper should be of interest to readers in the areas of aquaculture

In this paper we reported that the using of recombinant growth hormon combining with 28 % protein level showed best result for growth and good quality of striped catfish meat

Please address all correspondence concerning this manuscript to my colleague at alimuddin_alsani@yahoo.com.

Thank you for your consideration of this manuscript.

Sincerely,

Reni Agustina Lubis
