April 10, 2017

Dear Editor in Chief KESMAS : National Public Health Journal

We would like to submit a new manuscript entitled “Factors Associated With Unsafe Behaviour on Rotary Lathe Department PT IAW Wood Industries Tarakan” for consideration by the Kesmas: Public Health Journal.

We confirm that this work is original and has neither been published elsewhere nor currently under consideration for publication elsewhere.

In this paper, we report on “what variables that most influence to the unsafe behavior at work?”. This is significant because previous studies have proved the main cause of workplace accidents is unsafe behavior at work. The paper should be of interest to readers in occupational health and safety.

This research has the novelty aspect in the selection of research variables, type of work and data analysis. This study analyzed more fully aspects of behavioral determinants of labor, because it involves aspects of inner and outer aspects of employment, including aspects of the physical environment of work and the role of labor supervisor. This article will be interesting to read because the number of accidents in Indonesia is still high and the cause is due to behavioral factors.

Please address all correspondence concerning this manuscript to me at :
iwanmuhamadramdan@gmail.com.

Thank you for your consideration of this manuscript.

Sincerely,

Iwan M. Ramdan
