LITERATURE REVIEW

Every tourist who will travel to an area, both a tourist destination and other areas, first does the planning by making a reservation. In general reservation namely booking facilities which include accommodation, meals, seats at performances, airplanes, trains, buses, entertainment, night clubs, discoutegues and so on (Suartana, 1987:14) The word reservation or booking in the world of tourism is also called booking. Sometimes tourists cannot distinguish the meaning of the two words. Therefore it needs to be emphasized that the two words do not have different meanings (Yoeti, 1997:45) In the world of tourism reservation is an institution or a very important way and is one of the holders of control for the continuity of the activities of a travel agency.

Previously a person or tourists travel to a place and stay at the destination, then the person or tourists must make travel plans and make reservations on accommodation, transportation, tour programs, restaurants and performances as needed. These things are very important and must be known by tourism industry officials, especially in the reservation department of a travel agency/reservation department.

The definition of reservation department is not only independent of the functions and duties of the reservation department itself, namely the provision of a place either before guests or tourists come. The function of the reservation department in general are serving tourists in preparing places (hotel rooms, in-flight seating, tours and transportation), Prepare a professional guide, and Making correspondence with related parties and archives. To facilitate tourism services, a travel agency is needed to support this. A travel agency is a commercial business activity that regulates, and provides services for, a group of people, to travel with the primary purpose of traveling.

The order flow used by PT Kakabantrip Tour and Travel is a Flowchart taken from the journal Apriani Tjia. The flow of booking a tour package is exactly the same as what PT. Sakaban Tour And Travel Service does. In the flow, the staff provides details of the tour package with details of the trip and the price - then the tourists choose the travel package tour - the tourists make the package booking - then the staff confirms, then makes a booking invoice and payment confirmation.

Customers order a travel package by email, then ask the price of the package details for sailing to Komodo Island, then after the customer has agreed to order a Kakabantrip sailing tour package, followed by sending participant data (the Registration Form that has been filled) + proof of reading via email. Here are the steps:

1. Send Request price and itinerary details via Email to info@kakabantrip.com.
2. Fill in the participant data (Registration Form) sent by the kakabantrip.
3. Make a payment Bank Transfer / Cash, can be through BCA bank account Kakabantrip or come directly to the office of Kakabantrip by giving cash.
4. Send the Registration Form (already filled in) + Proof of Transfer via Email to info@kakabantrip.com

Based on the travel package reservation flow diagrams made by Apriyani Tjia, namely with flow charts, Data Flow diagrams, level 0 diagrams and level 1 diagrams, Kakabantrip uses the flow chart of travel package reservation flow charts which are much simpler than the other three reservation lines which is far more effective and brief, so consumers are also more comfortable ordering a cruise tour package to the island of Komodo because consumers only fill in the registration form that is in accordance with the needs of tourists by booking facilities which include accommodation, meals, seats at shows, airplanes, Phinisi Boats, Cars, entertainment, night club, discoutegue and so according to what Suartana (1987: 14) said about general reservations that are also in accordance with In the Tourism Handout stated that "Reservations are verbal or written communication.

According to the author, Kakabantrip has a travel package reservation flow that is so simple and common for travel agents because it is a small company that has little human resources and a very simple organizational structure with 1 director - 1 secretary - 1 accountant who doubles as a tour leader and 4 marketing people who also double as marketing and tour leaders as well. However, with a simple reservation flow, it allows Kakabantrip to receive a lot of reservations and it is not too difficult to take care of the order so that saves time to take care of the order for the sake of booking. Evidenced by the large number of tourists who book a cruise tour package to the island of Komodo from 2015 to 2017.
