8th July 2022

Dear Prof. Dr. Dewi Susanna,

We would like to submit a new manuscript entitled “Measuring the success of PeduliLindungi app use for supporting COVID-19 prevention: a case study among university students in Jakarta, Indonesia” for consideration by the *Kesmas: Jurnal Kesehatan Masyarakat Nasional (National Public Health Journal)*.

We confirm that this work is original and has neither been published elsewhere nor currently under consideration for publication elsewhere.

In this paper, we report on the evaluation of the use of *PeduliLindungi* mobile application for preventing COVID-19. This is significant because it is expected to give an insight for various stakeholders in order to improving the use of mobile application in order to prevent the pandemic currently and further health challenges in the future.

Although several studies on the acceptability of the PL application have been undertaken, to the best of our knowledge, there are no publications that evaluate the use of the PL application using The Delone & McLean Information System Success Model (D&M IS Success Model). The D&M IS Success Model was one of the most popular and well-validated methods for determining the success of an information system.

Please address all correspondence concerning this manuscript to me at yustiyani@uinjkt.ac.id

Thank you for your consideration of this manuscript.

Sincerely,

Yustiyani
