Dear Editor of Bulletin of Chemical Reaction Engineering & Catalysis,

I would like to submit our manuscript entitled "Synthesis of 2,2,4-Trimethyl-2,3-dihydro-1H-1,5-Benzodiazepine using Treated Natural Zeolite Catalyst" to be published on the Bulletin of Chemical Reaction Engineering & Catalysis. We present a versatile and efficient method for the synthesis of 1,5-benzodiazepine derivative using inexpensive catalyst mordenite, a natural zeolite type under solvent-free condition in a good yield and short reaction time. The catalyst can be reused up to 4 times without significant lost in its catalytic activity.

Should you have any request, please let me know.

Surakarta, February 14, 2017

Best wishes,

Maulidan
