## **Editorial Committee Preface**

Dear Readers,

Welcome to the International Journal of Remote Sensing and Earth Sciences Vol. 11 No 1, June 2014. This journal is expected to enrich the serial publications on earth sciences, in general, and remote sensing in particular, not only in Indonesia and Asian countries, but also worldwide.

The contents of this journal are particular interest to remote sensing as the main data for geosciences, oceanography, marine biology, fisheries, meteorology, etc. In this eleventh edition, various topics are discussed, including studies of digital image processing of SPOT-4, MODIS standard (OC3) chlorophyll-a algorithm evaluation, detection of acid sludge contaminated area, interpolation methods for sea surface height mapping, application of CMORPH data for forest/land fire risk, synergy approach for implementing the policy on high resolution imagery, detecting the spatial distribution of settlements, and application of Van Hengel and Spitzer algorithms for information bathymetry extraction.

This journal is intended, among others, to complement information on Remote Sensing and Earth Sciences, and also encourage young scientists in Indonesia and Asian countries to contribute their research results. Therefore, we would like to invite scientists to manifest their ideas through scientific research papers. We are looking forward to receiving your manuscripts for the next edition of this journal.

Editor-in-Chief,

**Dr. M. Rokhis Khomarudin**
